

WORLDWIDE INVENTORIES BUSINESS AIRCRAFT

WORLDWIDE BUSINESS AIRCRAFT AND ROTORCRAFT INVENTORIES

Forecast International's online-based Business Aircraft and Rotorcraft Inventories are indispensable data sources for industry planners and analysts at all levels, as well as unique sales tools for locating aftermarket opportunities. These robust databases are sortable by any combination of user-selected fields, offer automated subtotaling, and are compatible with a wide range of spreadsheet programs. Our Internet-based, ID/password-protected site allows 24/7 access to invaluable real-time information.

These comprehensive databases pinpoint quantities and types of over 37,000 fixed-wing business aircraft, and over 29,000 business-class rotorcraft registered worldwide. They provide specific serial and registration numbers as well as full contact and other vital information.

Data Fields include: Date of Purchase, Age of A/C, Aircraft Manufacturer, Designation, Engine Type, Name of Registered Owner, Address, Phone and Fax. The date of purchase and ages of the aircraft are important, as they allow quick identification of the new and previously owned aircraft that are impacting aftermarkets.
